

Energy Code Compliance Summary – 9.36 Performance

PROJECT INFORMATION			
PID		PERMIT NUMBER	
CIVIC ADDRESS			
LOT		SUBDIVISION	
MODELLING REPORT SUMMARY			
Identify areas where there are significant differences in energy performance between the proposed and reference building models:			
System Type	Difference (Y/N)	System Type	Difference (Y/N)
Wall construction		Window and door performance	
Roof construction		Lighting power	
Exposed floor construction		Heating efficiency	
Basement wall construction		Cooling efficiency	
Slab construction		Ventilation efficiency	
Window and door area		Service water efficiency	
Other Areas of Note:			
PERFORMANCE			
Reference House Energy Use:		GJ/year	
Proposed House Energy Use:		GJ/year	
		% Improvement (min. 10%)	
Reference House Heat Loss:		GJ/year	
Proposed House Heat Loss:		GJ/year	
		% Improvement (min. 5%)
